

INSTRUCTIONS

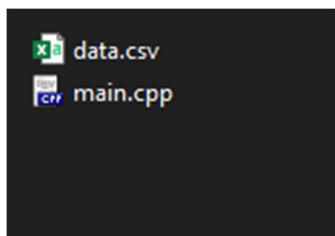

IDE: Dev C++

Compiler: TDM-GCC 4.9.2 64-bit Release

Number of Lines: 167

Following are the points which you should keep in mind while using this program,

1. Put both files in a separate folder.

2. Column A shows the x value, Column B shows the y values, Column C shows the xX values and Column D shows the yY values.

A	B	C	D
1	0.0001	0.0023	0.000024
2	0.0002	0.0038	0.000038
3	0.0003	0.0053	0.000052
4	0.0004	0.0068	0.000066
5	0.0005	0.0083	0.000080
6	0.0006	0.0098	0.000094
7	0.0007	0.0113	0.000108
8	0.0008	0.0128	0.000122
9	0.0009	0.0143	0.000136
10	0.001	0.0158	0.000150
11	0.0011	0.0173	0.000164
12	0.0012	0.0188	0.000178
13	0.0013	0.0203	0.000192
14	0.0014	0.0218	0.000206
15	0.0015	0.0233	0.000220
16	0.0016	0.0248	0.000234
17	0.0017	0.0263	0.000248
18	0.0018	0.0278	0.000262
19	0.0019	0.0293	0.000276
20	0.002	0.0308	0.000290
21	0.0021	0.0323	0.000304

3. Don't put any heading in the csv file. If you change the name of the csv file, please change it in the program code as well.
4. Use the specific IDE for the program running, otherwise there could be different problem or errors in the program.
